PROJECTS

All my projects can be seen on my GitHub profile <https://github.com/TomKambale>
<https://github.com/g-mwenda/Free-gigs-project> - (Group Project) A freelancing platform aimed at linking freelancers and clients in Kenya. My primary role was in backend development with contributions made in front-end development as well.

<https://github.com/TomKambale/MotoReview> - (Group Project) A review website aimed at allowing local (Kenyan) reviewers to post reviews of motorcycles used in Kenya. I was involved in front-end design and development.

<https://github.com/TomKambale/Land-Calculator> - (Personal Project) A web platform that allows land owners and potential clients to make calculations of dimensions of structures they would like to build and/or look for land that best suits the dimensions of their structure and/or preferences for land sizes
